Spinball Vengeance!

The evil scientist Dr. Robotnik has unleashed his most diabolical plot yet to turn the animals of Planet Mobius into robots. His monstrous contraption, the Hog-O-Fortress, built on Mt. Mobius, is already transforming happy creatures into unrelenting slaves!

Robotnik's Eendish machine draws its power from the mountain's volcano. Every lava fuels the lethal Pinball Defense System that protects the Fortress.

Sonic and his pal Tails mount an air assault on the Fortress, only to be blasted in mid-flight by Robotnik's cannons.

Sonic is knocked into deep waters near the volcano. But he has friends in wet places — and is saved at the last moment!

Sonic sneaks into the Toxic Caves below the Fortress. From there, he infiltrates Robotnik's vast and deadly defenses. In no time at all, Sonic starts sniping Eendishs, freeing the animals of Mobius and dispatching out hedgehog justice!

Yo, Robotnik! You're in for a mountain of trouble now. Sonic is spinning into action!

Sonic SPINvasion

Your mission is to attack the Veg-O-Fortress, fight upward through the Perball Defense System and annihilate Dr. Robotnik's evil machine. Destroy the underlying boxes and boss machines to move up through the levels. Along the way, use your best perball wizardry to free the robotized inhabitants of Mobius!

THE CHAOS EMERALDS

Chaos Emeralds stabilize the Mt. Mobius volcano on which the Veg-O-Fortress stands. Without the Emeralds, a massive eruption would blow the Fortress to pieces!

You must spin, bounce and bump through the Perball Machines to reach all the Chaos Emeralds on each of four levels. When you've collected all the Emeralds, the Veg-O-Fortress will explode!

Sonic SPINology

The Pinball Defense System is a gigantic Pinball Machine. In it, you'll find a universe of whirling, flashing, buzzing pinball games.

Use the flippers to aim Sonic and fire him up through the volcano. When he's in flight, you can move him left and right with the D-Pad for better position when he hits a bumper or target, or when he's falling back toward the down bumpers or flippers.

Spinball Flipper Tips

- ❶ Launch Sonic by tilting both flippers together with **Button C**. This is a safe, easy tactic for beginners.
- ❷ Watch for lights and arrows leading toward important spots in the background.
- ❸ Catch Sonic on the flippers by holding them up just as Sonic moves into the Alley Ramp. Then you can aim him with better accuracy.
- ❹ To shoot Sonic straight up, fire when he is near the hinge of a flipper. To launch him at an angle, let him roll toward the tip, then fire.
- ❺ You will propel Sonic with steam valves instead of flippers in some places.
- ❻ If Sonic falls into the drain, it could be the end unless you take quick action. Robotnik has a pitfall trap planted under the flippers.
- ❼ Remember, you can control Sonic's travel with the D-Pad. You can slow his roll as an ally or curve him slightly toward a flipper when falling and jumping.

The Status Strip

The Status Strip at the top of the screen gives you a rapid-fire look at the following important information:

Player Number and Lives

This shows the current level, who is playing, and how many lives remain for that player. Sonic starts the game with three lives. Rack up 25 million points to gain an extra life!

Emeralds

This tells you the number of Chaos Emeralds Sonic needs to snag in the current level. (The number is different for each level.) It also shows how many times you need to hit an obstacle in order to open a path to a Chaos Emerald.

Urgent Orders

These messages need a quick reaction. They will tell you to hit an important target, or will warn you of impending hedgehog doom!

Loop Successes

Shows how many loops you've completed!

Score Update

Shows your current score.

End Totals and Messages

The Status Strip notes up your total score for loops, rings and time at the end of a level.

Sonic Status

When you see "Too Fast," you'll get another shot at the level. If Sonic is headed for hedgehog heaven, you'll see "Game Over."

Clearing the Levels

Sonic must guide all the Chaos Emeralds on a level to open the Boss Room door at the top of the level. Watch the Status Strip for the number of Emeralds you must collect in each level. Some of the gems are in difficult, deadly locations. You may have to bring mini-switches or bumpers in order to move the obstacles barring your way.

BEATING THE BOSSES

There is a trick to defeating the dangerous enemy in each Boss Room. Watch the Status Strip for hints — and encouragement when you're doing something right!

Bonus Rounds

At the end of every level, Sonic jumps into a Bonus Round. This is a game of regular poolball with Sonic at the controls! You have three balls to shoot around the board, hitting as many bumpers and targets as you can. Watch those points add up!

Use the tilt sticks (Buttons A, B and C together) to rattle the table and control the ball. Don't shake it too much or the machine will shut down and you'll lose a ball.

When the last ball goes down the drain, you return to regular play.

Scoring

Gain points by slamming into bumpers, shooting the tube loops and spinning into floating robots to de-robotized them back to their original forms.

At the end of a level, you'll collect bonus points based on the loops you made, the number of rings you collected, and how fast you made it through the levels. The points you earn in each category will vary with each level.

Destroy as much as possible of Robotnik's machines to make sure you get the highest score you can!

Loop Shots

Spin through the loops over and over again to get Loop Bonuses. Listen for the short musical riff that lets you know you scored!

Rings

Grab every ring in sight for big Ring Bonus points!

Time

Complete a level with a single ball at breakneck speed and you'll be rewarded with a monster Time Bonus — up to 10 million points!

Killing Jackpot

Each time you win a Bonus Round, your final jackpot increases. So keep on racking up those points!

The Veg-O-Fortress

THE TONIC CAVES

Explore the super-polluted caverns of the Veg-O-Fortress, where Dr. Robotnik dumps industrial waste. A wrong move here could mean being smothered in green slime, or — waste yet — chomped by a Revo!

Bash into barrels of waste, Chucknuts and Magma Worms. Getting one of the Emeralds could be draining. A Robotnik-faced killer bug named Scorpion bosses this level. Go for the stinger first!

LAVA POWERHOUSE

Floating Ferrons block the only escape routes through Dr. Robotnik's lava-powered generators. Use the stream jets-like flippers. Get help from the Chickbirds to get to higher places.

Destroy Dr. Robotnik's half-baked bombs in the Robo-Bomber Room!

THE MACHINE

This is where the helpless Melmas inhabitants are imprisoned and robotized.

Short cut the way with massive explosions! Risk being shredded in the grinding gears as you ascend to the main processing room.

Figure out the Veg-O-Machina's secret to free the hostages! The destruction of the Fortress begins!

SHEDDOWN

The Veg-O-Fortress is caving in on itself! Grab the last Chaos Emeralds and fight toward Robotnik's escaping rocket ship.

You'll face a treacherous climb through the space hanger. Kriondom block your way and Robotnik launches bombs to stop you. Even Robotnik's script is armed and dangerous!

END OF GAME

The despicable Dr. Robotnik scrambles frantically to blast off. He's desperate, and will even try to fight Sonic off with slashing mechanical claws. Timing is everything!
